

analyse des résultats

Globalement l'enseignement semble bien répondre aux attentes des étudiant·e·s.

89% d'accord moyen aux différentes questions

81% d'accord à la question 14

Certain·e·s étudiant·e·s apprécient :

La disponibilité de l'enseignant et la qualité de **ses explications**.

3 commentaires

question 11: 96% d'accord

3 commentaires

La complémentarité du cours et des séances de travaux pratiques qui leur permettent d'appliquer les notions abordées et de distinguer **leur utilité et utilisation concrète**. Ils/elles ont particulièrement apprécié **le cours sur stata**.

2 commentaires

question 10: 89% d'accord

2 commentaires

question 13: 89% d'accord

3 commentaires

Un enseignement clairement **structuré**.

2 commentaires

question 2: 93% d'accord

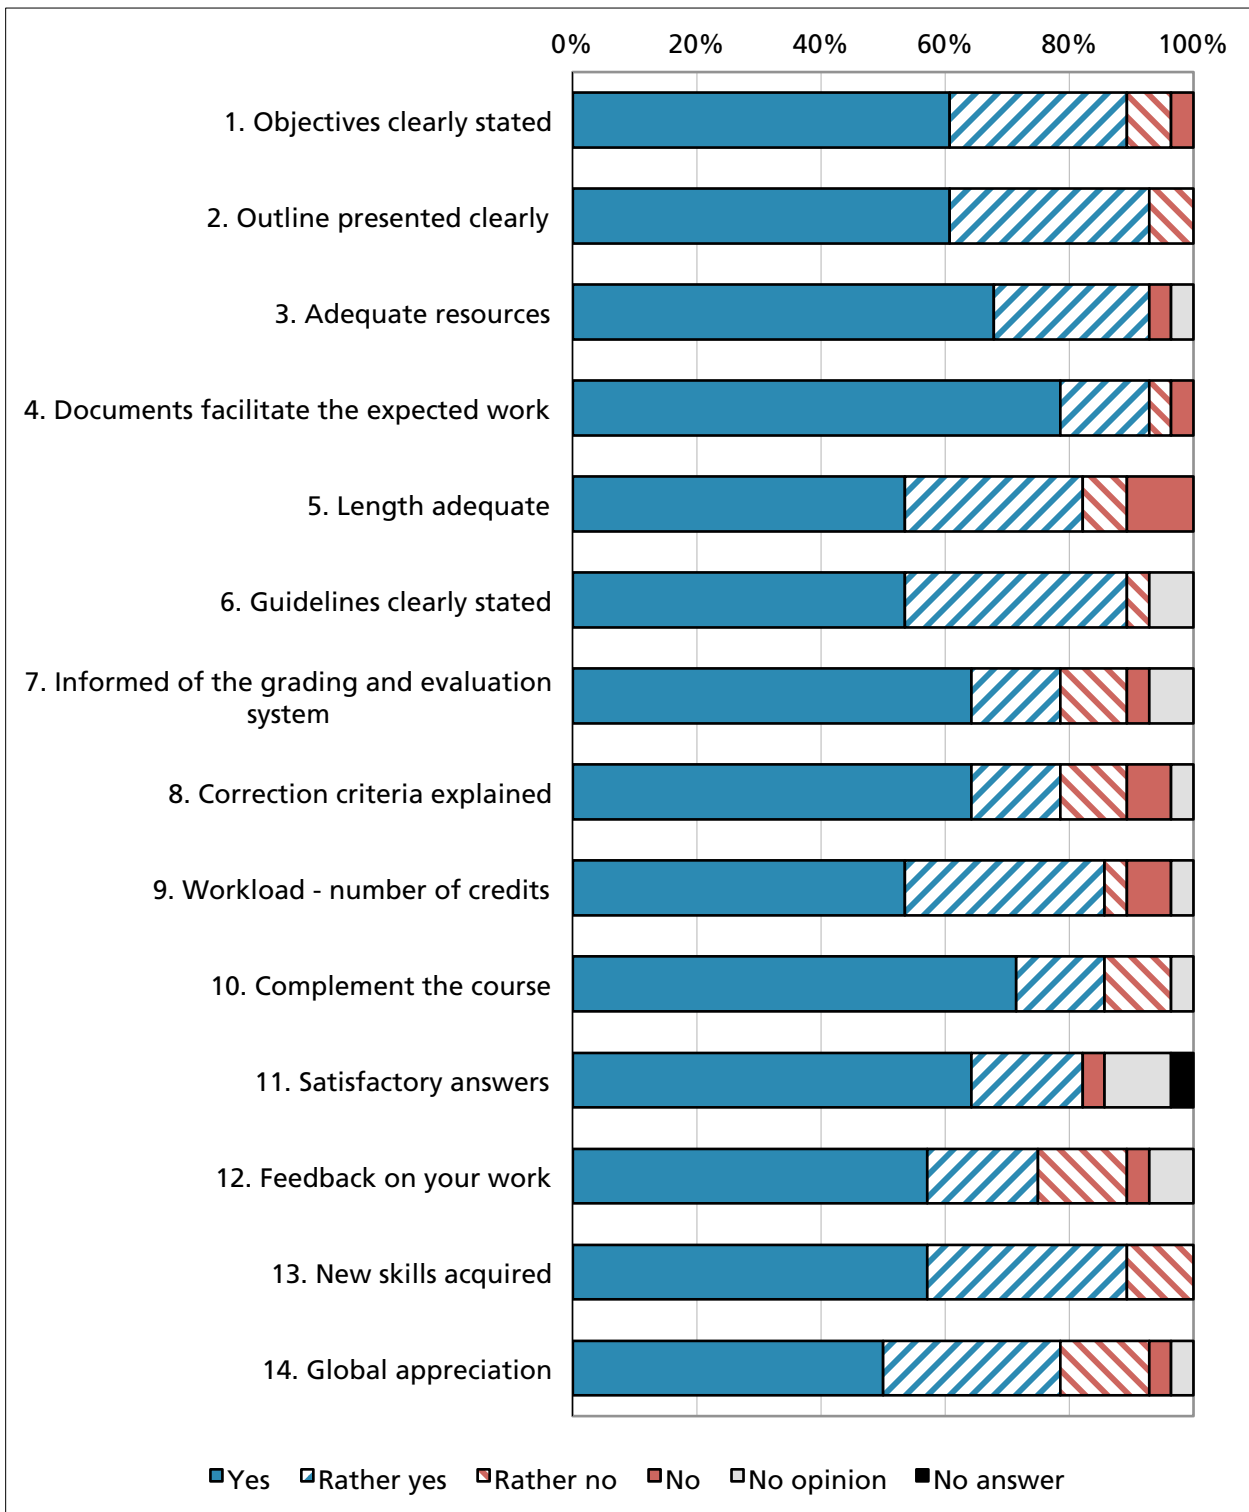

Certain·e·s étudiant·e·s souhaiteraient :

Certain·e·s étudiant·e·s souhaiteraient avoir **davantage de séances d'exercices ou disposer de plus temps** compte tenu de l'étendue de la matière à traiter.

4 commentaires

mais question 5: 82% d'accord

strengths	aspects to be improved	comments, clarifications, suggestions
Well structured and presented!	These exercise sessions were too short! We always had to go very fast through the material.	I think more exercise session is needed. Maybe split one in two weeks!
The assistant always pushes us to ask questions or to answer to some of his own questions. The TP are, thus, quite dynamic.		
Very good explanation of stata		Good and available TA
Working on stata. Get feedbacks		
Practice helps to understand the concepts. Understanding of steps that a researcher faces.	To much things to do in a small period of time. Less material or more lab session.	
Fabrizio is available.	Everything.	
Practicing the lectures.	More exercices.	
We can visualize more what econometrics represent in real life.		
Concise explanations		
Really good your stata courses!		
Very well! At first a bit unclear, but then very good		
Fabrizio did an incredible job explaining. It was always easy to follow up but sometimes one got lost b/l we went too fast due to time.	Maybe split workload to more sessions. Sometimes time was a scarce resource in solving all exercices with stata.	The way he explains shows his passion for econometrics.
Fabrizio made a great effort, being his first time teaching the course. Maybe would be better to improve the tone of the voice.	The lab session should be every week. I think the lab session is the time where you learn the most, both in theory and practice. The last session we had to run a lot and we could not cover the important material.	For people willing to follow the non-academic path, learning stata is very useful. Most time should be dedicated to this. Program evaluation techniques should be cover with more detail. More examples.
Provide good understanding of how to use stata.		
Structure	Seems to be not that.
